EDUCATION

[Advanced JavaScript Online training course.](#)

April 2023 – Jun 2023

An advanced JS programming online course teaches experienced developers advanced skills to build sophisticated web applications using advanced language features.

AESP –Amideast, Hebron

February 2023 – May 2023

The American English Scholarship Program (AESP) aims to make unemployed university graduates more competitive in the job market and U.S. graduate study programs. It's a 120-hour program funded by the American House and the U.S. Office of Palestinian Affairs.

Palestine Polytechnic University, Hebron — 80.3%

August 2018 – January 2023

Bachelor's degree in Computer Engineering.

PROJECTS

[Object Categorization for Industrial Application](#) — *graduation Project from the university*

The system is a cost-effective, deep-learning-based object categorization system that categorizes three types of objects with high accuracy of 90% and an average inference time of 500ms, making it an effective automated sorting solution on assembly lines.

[Delivery Food App](#) — Self-learning project

A Full stack food delivery application using **Reactjs**, **Firebase**, **Framer motion**, and **Tailwind CSS**. This project allows users to add new items and maintain everything over the **Firestore** cloud database.

[Simple CRM System](#) — Gaza Sky Geek (React Training)

Simple CRM system building with **ReactJS** aims to store customer and prospect contact information and identify sales opportunities.

CERTIFICATION

[React Training Course](#) — September 2022 – December 2022

Gaza Sky Geek

The system is a cost-effective, deep-learning-based object categorization system that categorizes three types of objects with high accuracy of 90% and an average inference time of 500ms, making it an effective automated sorting solution on assembly lines.
